

## NC3FAH-DAE

New: With ESD protective push tab improving electrostatic discharge and component protection.

The `State of the Art` receptacle. Round plastic body XLR PCB mount panel connector. These have the smallest size and highest packing density ( 23 mm between centres). New designed tulip type contacts with hard gold plating and polished contact areas. Improved ESD performance with asymmetric non-metallic push.

The all plastic A-Series offers the most space saving and cost effective design.

## MEEMTMRIR

## Features \& Benefits

- Protection against electrostatic discharge and components due to compound material of the push tab
- Smallest XLR receptacles, highest packing density
- Tulip type female contact
- Plastic housing
- Polished contact areas and hard gold plating
- Housing flammability UL94 V-0
