DANTE®
AUDIO INTERFACES

LINE I/O TO DANTE® INTERFACE

Connect your legacy audio gear to the DANTE® world. The Line I/O to DANTE® Interface is an end-of-network device. It is a breakout box which allows two channels of audio to be integrated into a DANTE® network. Simultaneously, NA-2I2O-DLINE converts a DANTE® stream into analog audio signals. Hence, it is possible to use this tiny box to feed analog audio signals into the DANTE® network while at the same time receiving a mix from another DANTE® source.

Line I/O to DANTE® Interface is designed for harsh stage conditions. It therefore features lockable chassis connectors for both the audio and network connections. For fixed installations, the rubber protection can be removed. With optional mounting brackets or a rack panel, the box can be mounted below tables, in floor boxes, or in equipment racks.

DANTE® AUDIO INTERFACES

LINE I/O TO DANTE® INTERFACE

Order No.	Description
NA-2I2O-DLINE	2 Line Input and 2 Line Output with 1 DANTE®/RJ45 Ethernet Port
NA-2I-DLINE	2 Line Input with 1 DANTE®/RJ45 Ethernet Port
NA-2O-DLINE	2 Line Output with 1 DANTE®/RJ45 Ethernet Port
